Choose a website that offers free ringtone downloads (see Resources). These sites don't make money from ringtones downloaded, but make money from flashy ads and banners appearing in their sidebars and over the top of your page. These sites are safe as long as you stay on one site and do not provide personal information or sign virtual contracts. Search for and select the ringtone you want to put on your Virgin Mobile phone. You can search for song title, music genre, or sound type. Choose how you want to receive the ringtone on your phone. If you have unlimited text and pix messages via Virgin Mobile, you can send it directly to your mobile phone in a text message for free. You may or may not need to select Virgin Mobile as your mobile operator to send it to your phone via text message. If your site offers really free downloads, you don't have to worry about reading through a terms of service or clicking I accept to something before sending the ringtone to your phone or downloading it. If you don't have unlimited text or you're uncomfortable entering your mobile number, download it to your computer via direct download or by sending it to your email address as an attachment. Connect your phone to your computer via a USB cable. If Virgin Mobile didn't give you one when you bought your phone, you can buy one to fit through your Virgin Mobile store or buy one online. Open the file on your computer and click and drag it into the data storage area of your phone. Wait for the transfer to complete and safely eject it from the USB drive.
